CADE KENDALL

Fort Mill, SC | (803) 415-7982 | cadekendall7@gmail.com | LinkedIn

EDUCATION

Clemson University **May 2027**
B.S., Financial Management & Accounting (Double Major) (GPA: 3.68)
- **Achievements:** Dean's List (2023–2026)

EXPERIENCE

Ginkgo Residential |

Investor Relations Contractor **Aug 2026 - Present**
- Provide ongoing financial modeling with Python (pandas, NumPy) and Tableau, review LOIs, and support ad-hoc transactions, delivering clearer investment insights that speed senior-leadership decision-making

Investor Relations Intern **May 2026 - Aug 2026**
- Enhanced multifamily underwriting models (fee rollouts, debt sizing, pro-rata capital logic) and built a dynamic 1031 exchange model automating T-12 integration; results were integrated into internal waterfall structures used across GP funds and the private REIT.
- Redesigned and automated quarterly shareholder reporting into scalable models that support portfolio growth and reduce manual processing.
- Built capital-raise and financing models for REIT notes and GP funds and developed a full REIT comparable set benchmarking AFFO, distributions, and leverage in Excel, which equipped board-level presentations and helped secure additional funding

McGraw Hill | ***Student Campus Ambassador*** **Aug 2025 - Present**
- Led campus outreach initiatives that drove a 30% increase in engagement across 500+ students.
- Built and delivered PowerPoint presentations featuring Tableau and Excel visualizations, collaborating with marketing and sales teams, which raised campaign awareness among the target audience

Bank of America | ***Job Shadowing*** **May 2025 - Aug 2025**
- Sat in on fraud-team meetings covering day-to-day operations and Venmo/cash-like transactions.
- Observed internal budgeting discussions and next-year resource request Analyzed financial data with Tableau and Bloomberg Terminal, creating visual reports that supported advisory discussions and helped senior professionals deliver clearer recommendations

PROJECTS

Energy DCF Valuation & Research Application | https://github.com/CadeKendall/DCF-Model
- Built a Python-based valuation application for public energy companies using historical financial and operating data to forecast unlevered free cash flow and implied equity value.Building a reusable valuation and research application for publicly traded energy companies, initially focused on U.S. upstream / E&P businesses.
- Designed a reusable framework for DCF valuation, WACC, terminal value, scenario analysis, and sensitivity analysis with integrated financial-data and SEC filing sources.

EY Tax Case Competition
- Evaluated a transition from income tax to VAT, analyzing revenue stability and economic incentives.
- Developed structured frameworks to assess fiscal and macroeconomic impacts and presented findings to judges.

Valuation & Capital Structure Analysis
- Estimated beta via Excel regression and calculated WACC for valuation analysis.
- Modeled debt vs. equity financing scenarios to evaluate cost of capital, EPS impact, and optimal capital structure.

SKILLS

Technical: Excel, Tableau, Power BI, Bloomberg Terminal, SQL, Microsoft Access, PowerPoint, ERP Systems
Programming & AI: Python (pandas, NumPy), LLM API integration, local model deployment, ChatGPT, Copilot, Claude
Core Competencies: Communication, Teamwork

EXTRACURRICULAR

Finance Club | ***Member***
- Participated in finance recruiting events and was included in Clemson's Finance Resume Book.

Wall Street South Club | ***Member***
- Manage a simulated $100,000 portfolio using Excel-based trading and valuation models.
